PROFESSIONAL SUMMARY

Fourth-year Software Engineering student with experience in IT support, programming training, and software development. Worked at Bandırma Onyedi Eylül University through the İŞKUR Youth Program and contributed to vehicle tracking and fleet management projects during my internship at Mobiliz. Interested in backend development, distributed systems, and real-time applications.

TECHNICAL SKILLS

Programming Languages:

Java, C#, Python, JavaScript, C/C++

Backend Development:

Spring Boot, Spring MVC, Spring Data JPA, Spring Security, ASP.NET Core, RESTful APIs, JWT

Distributed Systems & Messaging:

Apache Kafka, RabbitMQ, Redis, Hazelcast, Microservices, Event-Driven Architecture

Databases:

PostgreSQL, SQL

Frontend Development:

React, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap

DevOps & Tools:

Docker, Git, GitHub, Postman, Linux

WORK EXPERIENCE

- BANDIRMA ONYEDI EYLÜL UNIVERSITY – IT SUPPORT / PROGRAMMING ASSISTANT | MARCH 2025 – JUNE 2026
- MOBİLİZ – SOFTWARE ENGINEERING INTERN | JULY 2026 – AUGUST 2026

PROJECT EXPERIENCE

Vehicle Tracking & Fleet Telematics Platform:

Java 21 | Spring Boot | Apache Kafka | Kafka Streams | TimescaleDB | PostGIS | Redis | WebSocket | Docker

- Developed an event-driven platform for real-time vehicle tracking and fleet management, including telemetry processing, geofencing, trip detection, and route tracking.
- Implemented Kafka-based event streaming, rule-based violation detection, live vehicle monitoring, and time-series/spatial data management.

Event-Driven Microservices Pipeline:

Java | Spring Boot | Apache Kafka | RabbitMQ | Redis | Hazelcast | PostgreSQL | Docker

- Designed and implemented an event-driven microservices architecture with asynchronous communication between independent services.
- Used Kafka for event streaming, RabbitMQ for notification workflows, Redis for caching and idempotency, Hazelcast for distributed data management, and PostgreSQL for persistent storage.

CoreMetrics – Real-Time SaaS Analytics Platform:

C# | ASP.NET Core | PostgreSQL | Google Cloud Run | Server-Sent Events | JavaScript | Tailwind CSS | Chart.js

- Developed a real-time website analytics platform for tracking visitors, sessions, page interactions, and geographic data.
- Implemented RESTful APIs, Server-Sent Events for real-time updates, API key authentication, session tracking, and serverless deployment using Google Cloud Run.

EDUCATION

- Bandırma Onyedi Eylül University Software Engineering | 2023–2027**
